

## Welding and Fabrication Services

BES&T is pleased to offer a full range of welding and fabrication services. While fabrication specific to pre-commissioning cleaning services are certainly our focus, BES&T has also undertaken other fabrication, including work on construction of structural supports for non-power related projects.

Whatever your custom fabrication need might be, BES&T can either assist directly, or obtain outside vendor assistance with custom fabrication and welding in your area.

## Other Related Services

Pre-commissioning cleaning often requires specific technical services that might be challenging to locate or obtain. BES&T can arrange to meet these unique challenges with our experience throughout the entire process of cleaning your project.

**Pipeline Pigging** – BES&T has performed pipeline pigging on several projects both stateside and in national and international waters.

Removed and replacement hydro turbine

**Hydro Power Plant Turbine Overhaul** – Our technicians have overhauled generator systems that have been in use for decades, cleaning and repairing needed parts and equipment during scheduled outages.

**Electrical Maintenance Services** – Experienced technicians can perform routine maintenance on electrical systems during scheduled outages or unscheduled emergency situations.
